Verde Valley Medical Center Speech, Language and Swallowing Program

VVMC's Speech, Language and Swallowing Program provides evaluation and treatment to patients who have been affected by accidents, traumatic injury, stroke, disease processes, congenital disorders, birth defects, or birth trauma.

Program features:

- Comprehensive evaluation
- Individualized treatment plans utilizing patient and family goals
- Caring and skilled therapists

Conditions and disorders treated include, but are not limited to:

- Cerebral palsy (CP)
- Developmental speech/language delays
- Specific language impairment
- Craniofacial abnormalities
- Articulation impairments/tongue thrust
- Swallowing disorders
- Laryngeal and oral cancer rehabilitation
- Accent reduction
- Voice therapy (nodules, chronic hoarseness)
- Aphasia, apraxia, and dysarthria therapy
- Cognitive and memory disorders
- Hearing impairment/aural rehabilitation
